Uninstallation of the Previous Jitterbits Installation

If you have a previous version of the *Jitterbits Dictionary* installed on your PC you don't need to specifically uninstall it. But if you have the same version, as the one you plan to install currently, please first uninstall it. To do this, open the *Windows Control Panel* and double click on *Add-Remove Programs* icon.

Locate and select the installed *Jitterbits Dictionary* in the list of installed products and click on its corresponding *Remove* button.

Confirm the product removal. The installation wizard will remove the installed version of *Jitterbits Dictionary*.

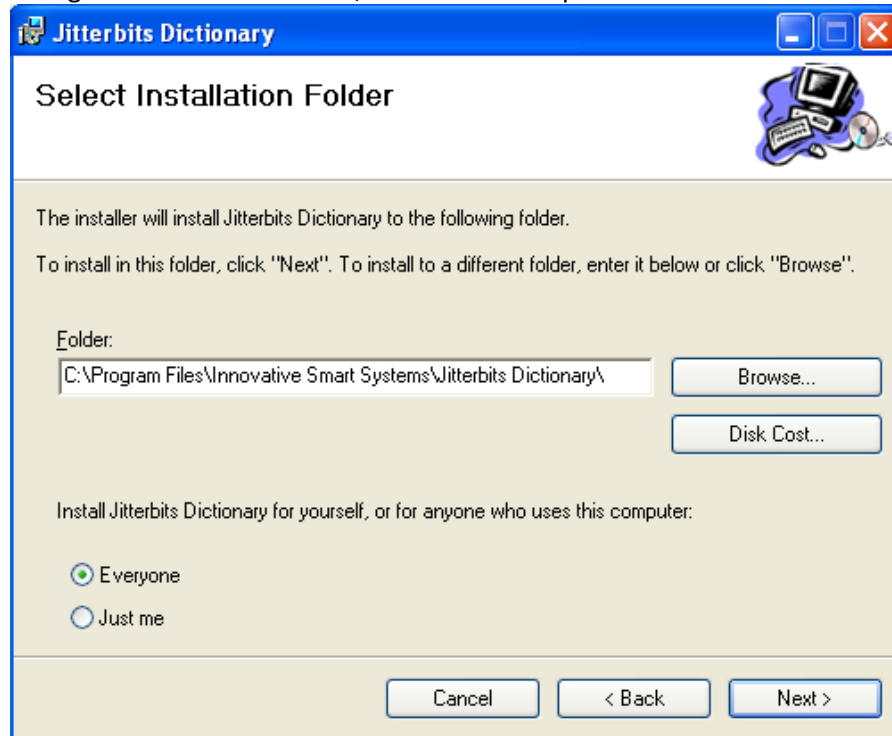

Installation of the Jitterbits Dictionary

Locate the installation file of the *Jitterbits Dictionary*. If the downloaded file is in *zip*-format, first extract the *.msi* installation file. Double click on the *.msi* file to start the installation of the product.

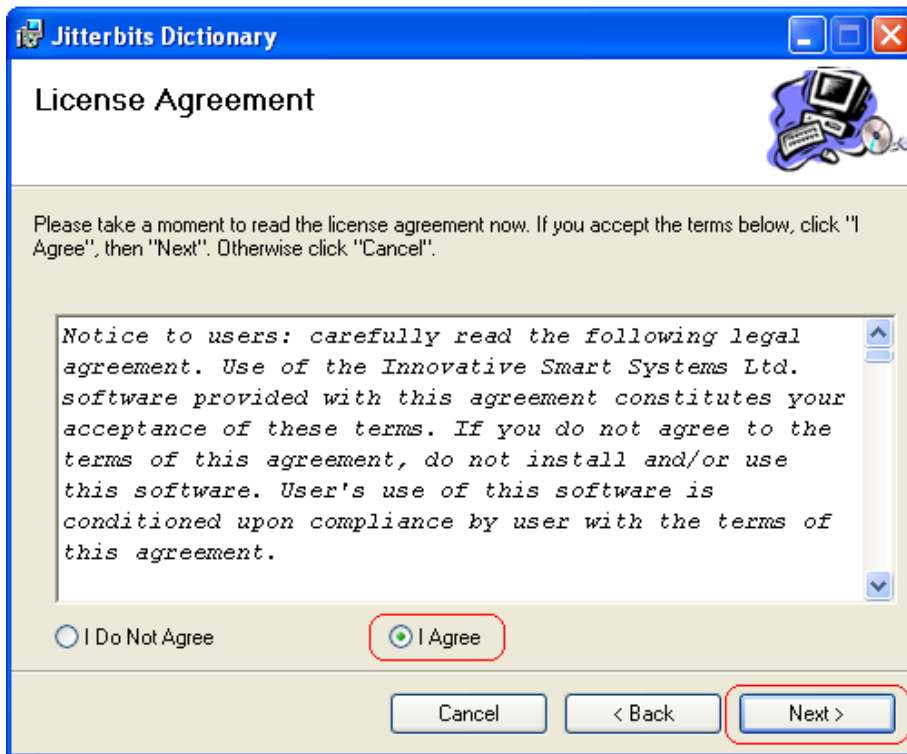

Name	Size	Type
cedict_ts.u8	1 815 KB	U8 File
JBDictionaryDemo05.zip	2 464 KB	WinRAR ZIP archive
JBDictionaryDesktopDemo.msi	1 465 KB	Windows Installer P...
JBDictionaryDesktopSetup.msi	2 793 KB	Windows Installer P...
JBDictionaryPocketDemo.exe	979 KB	Application
JBDictionaryPocketSetup.exe	2 292 KB	Application
JBDictionaryPocketSetup.zip	2 290 KB	WinRAR ZIP archive
JBDictionarySetup05.zip	5 099 KB	WinRAR ZIP archive

The product setup wizard will show up. You need to have the *Microsoft .Net Framework* version 2.0 or higher installed on the PC in order to work with the *Jitterbits Dictionary*. If you don't, the product setup wizard will provide you a download link. You need to download and install the *Microsoft .Net Framework* first, and then run the *Jitterbits Dictionary* installation again.

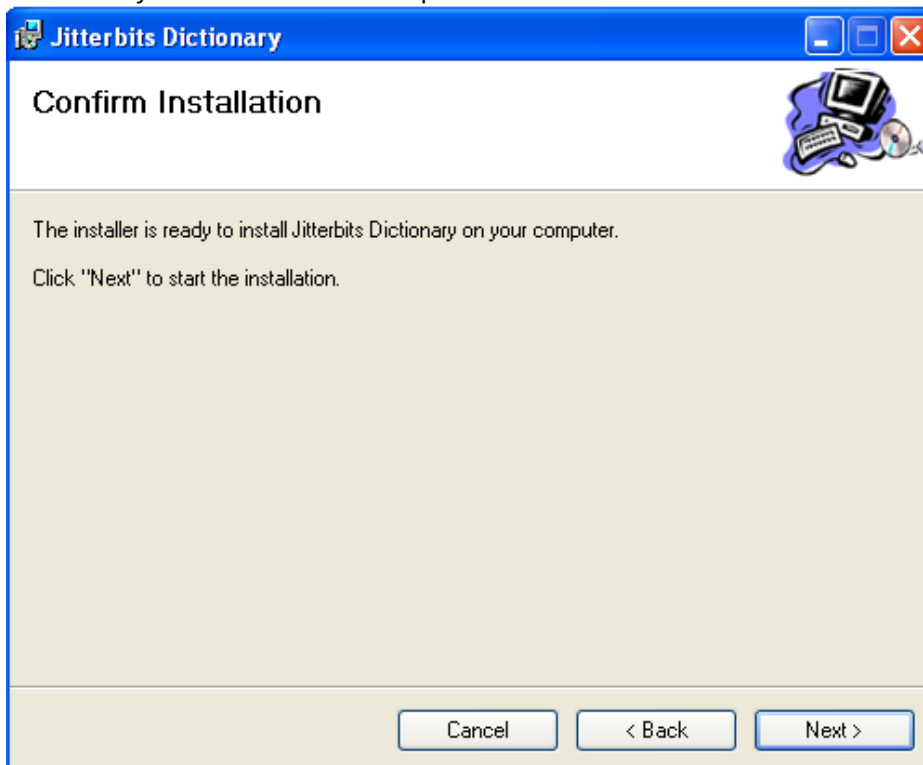

On the *Welcome* screen press the button *Next*. On the *Select Installation Folder* screen you can change the installation folder, if needed. Then press the button *Next*.

On the *License Agreement* screen mark the *I Agree* check box and then press the button *Next* to continue.

On the *Confirm Installation* screen press the button *Next* to start the installation of the product.

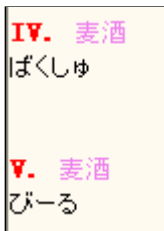

The setup wizard will copy the product files to the specified installation folder. After a successful installation you will get the *Jitterbits Dictionary* icon on your desktop. Double click on it to run the *Jitterbits Dictionary*.

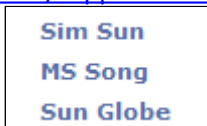

Manual Installation of a Proper Font

If you plan to use the *Chinese-English* or *Japanese-English* translations, you would need a proper font installed. The font should contain the graphical representations of all needed characters.

You can download manually a proper font from our support web page - <http://www.iss-bg.com/support.html#jbdict>

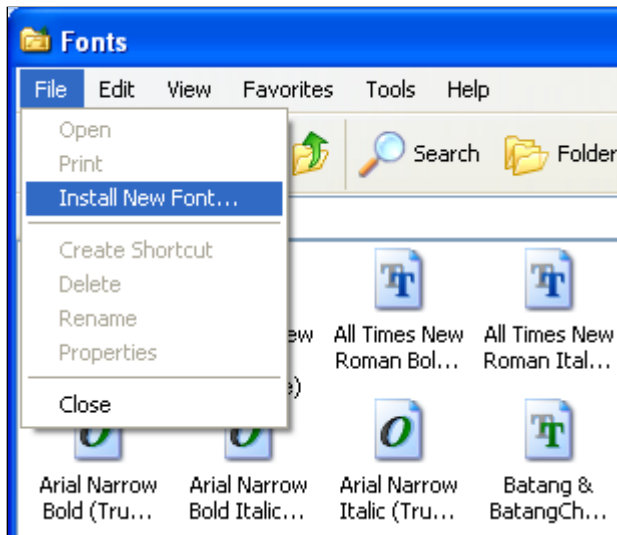

Normally the downloaded file is in *zip*-format. Please first extract the font it into temporary folder.

Name	Size	Type
mssong.ttf	2 509 KB	TrueType Font file

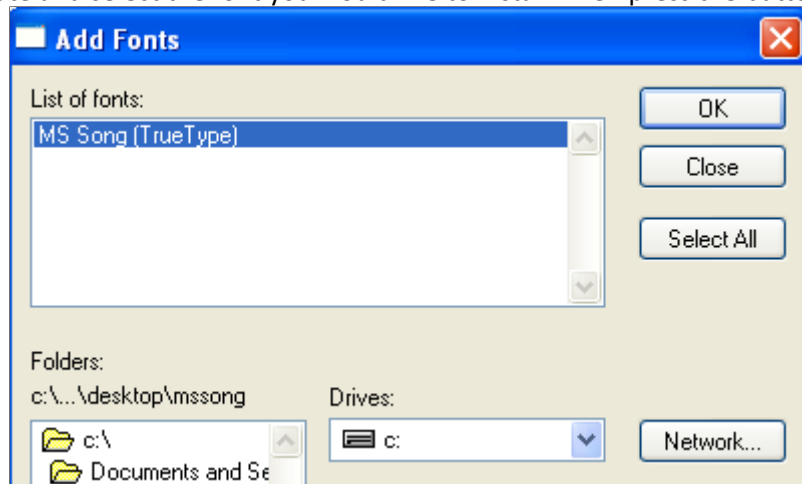

Then open the *Windows Control Panel* and double click on the *Fonts* icon.

The *Fonts* screen will show up. From the main menu select *File / Install New Font*.

Locate and select the font you would like to install. Then press the button *OK*.

Finally run the *Jitterbits Dictionary* and select *Options / Settings* from the main menu. The *Settings* dialog will show up. Select the newly installed font. The new font will become the default font used by the *Jitterbits Dictionary*.
