Installing Dictionary Package on Jitterbits Dictionary Desktop Edition

You can download manually and install dictionary packages (translations) of your choice. *Jitterbits Dictionary* allows the simultaneous usage of multiple translations and dictionaries. To install a manually downloaded dictionary package (translation), select the menu *Dictionary / Import Dictionary / From Dictionary Package* on the *Jitterbits Dictionary* main screen. The *Open File* dialog will show up.

Select the previously downloaded dictionary package (*zip*-file) you would like to install and press the button *Open*. *Jitterbits Dictionary* will unpack and install the selected dictionary package (translation) along with all its dictionaries. When the installation completes you will get a notification message.

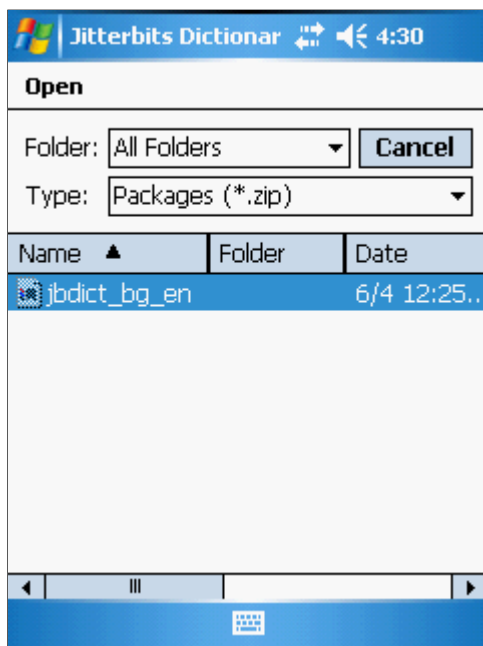

To check all available translations (and optionally select a new dictionary), select the menu *Dictionary / Select Dictionary* on the main screen.
